Event Programme

Visual Factory – Applications in the Process Industries
3 September 2019 – Leeds Marriott Hotel,
4 Trevelyan Square, Boar Lane, Leeds LS1 6ET

Who should attend?

With a visual factory an organisation can understand the status of their operations "at a glance", speeding up problem solving and increasing situational awareness, making for a more productive and safer factory.

Managers and team leaders wanting to better understand Visual Factory techniques and how to apply them and make them successful should attend this course. It will be of interest to:

- Departmental managers:
  - Production and Operations
  - Purchasing
  - Technical
  - Maintenance/ Engineering
  - and other support functions
- Team leader and supervisors
- Business improvement/ continuous improvement personnel, and those challenged to deliver improvement projects
- Cross functional improvement teams

Why attend?

Visual Factories are more productive and safer environments to work in. Leaders are more effective, the business is more focused on the important issues, operators have greater situational awareness, deviations from standard and target are identified and addressed faster, and issues are escalated rapidly to the correct personnel allowing resources to be deployed quicker.

Visual Management tools and techniques as part of Lean Manufacturing originated in the automotive sector. There is not always a direct read across into the process industries. HFL Consulting have nearly a twenty year heritage adapting and implementing Lean in the process industries, so delegates will benefit from being taught by people with this knowledge and experience.

A Visual Factory:

- Aids and improves decision making by leaders and managers
- Focuses and aligns personnel on the important issues
- Minimises lost time in wasteful activities
- Supports continuous improvement across the organisation
- Improves safety – occupational safety as well as process safety
- Builds pride, ownership and professionalism
- Builds trust with stakeholders

This course will cover a range of tools and techniques that typically fall under the banner of Visual Factory.

Programme

09:30	Coffee & Registration
10:00	Welcome & Introductions
10:15	What is a Visual Factory. Why would you want one?
10:45	Workplace Organisation (5S/5C). Why it is not housekeeping. How to make it work in the Process Industries
