

## Event Programme

# COMAH Safety Report Requirements 20 Jan 2021 By Webinar

### Who should attend?

This course is aimed at safety professionals, managers and engineers involved in writing, updating or managing the COMAH Safety Report.

This course is for manufacturing companies only

### Why attend?

Under the COMAH Regulations, an Upper Tier Establishment is required to review and update their Safety Report at least every 5-Years or whenever a significant change occurs on site as required by Regulation 10 of COMAH 2015. The revised Safety Report then being submitted to the Competent Authority (CA).

The Seveso III Directive came into force on 13th August 2012 and was implemented through COMAH 2015. Changes include the re-classification of chemicals to align them with the United Nations' Globally Harmonised System (GHS) for the classification, labelling and packaging of chemical substances and mixtures, a greater focus on land-use planning and the provision of information to the general public, which must be made available electronically.

The Chemical and Downstream Oil Industries Forum (CDOIF) published guidance in September 2013, for determining the tolerability of environmental risk at COMAH establishments, CDOIF – Guideline Environmental Risk Tolerability for COMAH establishments v 1.0., which has subsequently been reviewed and updated. Operators of establishments are being encouraged to adopt this methodology within their Safety Report submissions.

This course explores the requirements of COMAH including the recent changes and will suggest practical pragmatic approaches to compiling COMAH Safety Reports in line with HSE requirements, so assisting in the quality and efficiency.

### Programme

<b>09:45</b>	Registration opens
<b>10:00</b>	Background and Key Aspects of the Regulations
<b>10:45</b>	Who Falls within the Regulations & Qualifying Substances
<b>11:15</b>	Coffee
<b>11:30</b>	HSE Requirements <ul style="list-style-type: none"> <li>• MAPP &amp; SMS</li> <li>• Safety Report</li> </ul>
<b>12:45</b>	LUNCH
