

Programme

NEW Permit to Work Training Course 14 May 2020 – Hilton Leeds City, Neville Street LS1 4BX

Who should attend?

This new and extended course has been specifically designed for anyone requiring to increase their underpinning knowledge of permit to work systems, including those who issue permits or those supervising or monitoring the work. It is also appropriate for managers who have responsibility for the audit and review of the permit to work system.

Why attend?

A Permit to Work is an integral part of a safe system of work and can help to properly manage the wide range of activities which can take place on a site. It is not simply permission to carry out a dangerous job. It is an essential part of a system which determines how that job can be carried out safely and helps communicate this to those doing the job.

The permit to work training will be in the form of a one-day course consisting of presentation and workshop exercises, and will provide learners with an understanding of the knowledge and tools required.
