

Event programme

REACH – the Basics

23 April 2020 – REACHReady Ltd, Kings Buildings, Smith Square, London SW1P 3JJ

Who should attend?

Our **REACH – the Basics** workshop is aimed at business and regulatory managers and practitioners working in companies that make, import or use chemicals. The day is ideal for anyone who needs to understand more about their obligations under the **EU27 and UK REACH Regulation**. It will also be of interest to suppliers of substances and mixtures who are looking to support their EU customers on REACH.

This introductory workshop is an excellent place to start for those who are beginning to define their REACH obligations, and for those who are new to the regulation.

Book by 23 March 2020 for the early booking discount.

Why attend?

The REACH (Registration, Evaluation, Authorisation and restriction of CHemicals) Regulation affects almost every chemical substance that you **manufacture, import or use** to make your products and to run your processes. Come to this workshop to ensure you understand what it means for your business!

This one-day workshop is designed to help companies with the practical implementation of REACH. The comprehensive programme provides an introduction to the key elements of the regulation and includes talks covering the implications for manufacturers, importers and users of chemicals throughout the supply chain.

This workshop will:

- ✓ Explore the scope and exemptions of the regulation
- ✓ Explain Registration, Authorisation and Restriction
- ✓ Describe the changes to EU safety data sheets
- ✓ Help you recognise the significance to your business

Throughout the day we will also cover implications of EU Exit, its implications for REACH and what businesses need to do by when to continue placing products on the UK market!

We use an informal style so there will be plenty of opportunity to quiz our experts throughout the day.

Outline Programme

09:30	Coffee & Registration
10:00	Welcome Introduction to the REACH Regulation
	What’s covered by REACH Scope of the regulation, exemptions and relationship with other legislation; what needs to be registered

Previous attendees said:

“An excellent course, well presented by a very knowledgeable and engaging person. Highly recommended.”

“A brilliant overview of what REACH is and the implications across the whole supply chain!”

“Definitely worth attending, even as a downstream user, to understand your obligations and responsibilities under REACH, how changes affect you and how to stay up to date.”

“A real thorough grounding for someone with no REACH experience.”
