

Event Programme

CDOIF Environmental Tolerability

23 Sept 2021, Marriott Manchester Airport, Hale Barns, WA15 8XW

Who should attend?

The training is designed for those who are involved in undertaking environmental assessments according to the Chemical and Downstream Oil Industries Forum (CDOIF) guidance, as well as those who procure, manage or deal with the output of such assessments.

Why attend?

The Chemical and Downstream Oil Industries Forum (CDOIF) have published guidance for determining the tolerability of environmental risk at COMAH Establishments, *CDOIF – Guideline Environmental Risk Tolerability for COMAH Establishments v 2.0*. Operators of Upper and Lower Tier COMAH establishments are being encouraged to adopt this methodology.

The training will be based on the requirements of this guidance and will lead learners through the use of presentations and workshop sessions.

The training will provide learners with an understanding of the knowledge and tools to;

- Proactively assess the environmental risks
- Develop skills in environmental assessment to understand how to identify potential MATTEs, and implement effective risk management strategies

The course will provide the underlying theory, plus an opportunity to practice applying the techniques.

Programme

08:45	Coffee & Registration
09:00	Introduction to Environmental Assessment/CDOIF
09:15	Necessary Groundwork
10:15	Coffee Break
10:30	Screening: Substance selection, Source-Pathway-Receptors (SPRs)
11:00	Workshop #1: SPR Development
12:00	Lunch
12:30	Extent and Severity
13:00	Workshop #2: MATTE Classes
14:00	Coffee Break
14:15	Frequency and Tolerability
14:45	Workshop #3: Frequency and Tolerability
15:30	ALARP Demonstration/Tips and Tricks
16:00	Q & A/Final Discussion
16:30	Close
