

**Event Programme**

**CIA Security Conference**  
**Wednesday 2<sup>nd</sup> October 2019**  
**Hilton Hotel, Neville Street, LEEDS LS1 4BX**

**Who should attend?**

The conference is primarily aimed at site leaders and those with operational security management responsibilities in chemical, pharmaceutical and refining businesses. There will also be a particular focus on cyber security, so anyone with a particular responsibility for or interest in this aspect of security in major hazard businesses will find this event invaluable in keeping up to date with developments.

**Why attend?**

Security is one of the biggest growing policy areas for chemical and pharmaceutical businesses. This is due to the continuing rise and prominent profile of security threats to us all – whether from challenges to physical site security, personnel security and vetting of staff, or cyber security. What are the current threats to our sector? What should be the priorities for your business? How can we raise awareness of security as a business risk to be managed? The **CIA Security Conference** brings together latest developments and current guidance in all the key areas of security for chemical businesses – brought to you by experts from government, industry, regulator and service provider perspectives.

The programme will feature illustrative case studies, latest developments and advice, and informed discussion – **this is an essential event to ensure you have the up-to-date information to effectively manage security to protect your business.**

*Exhibition space is available - please contact [events@cia.org.uk](mailto:events@cia.org.uk)*
