

Event Programme

**Introduction to the Industrial Emissions Directive
18 (pm) and 20 (pm) May Virtual Course**

Who should attend?

Who should attend?

- Existing environmental managers, coordinators or other individuals with involvement or responsibility for environmental compliance.
- Delegates either new to environmental management or wishing to gain an understanding of environmental compliance management.
- Senior managers wishing to gain an understanding of the breadth of environmental legislation and their scope of liability.

The course will provide an awareness of the IED and how this is the framework for all major UK environmental legislation which typically impact CIA Members in England with relevance to Scotland and Wales, and how to effectively manage compliance.

This course is for manufacturing, storage and distribution companies only

Why attend?

The Industrial Emissions Directive is overarching European legislation implemented in the UK by the Environmental Permitting Regulations 2016. This course will provide an overview of the IED, how it is implemented in the UK, the requirements to comply with Article 13, 14 and 15 of IED and how to minimise the environmental impact of your operations.
